

Seamlessly integrate your invoice processing between Concur Invoice and Sage Intacct.

What is InvoiceConnect?

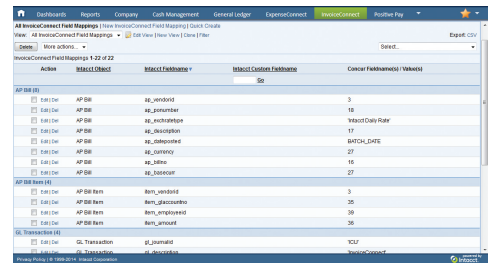

InvoiceConnect creates an automated integration between SAP Concur and Sage Intacct and completes your invoice workflow. This cloud based connector is pre-packaged and gives you the power to manage the data mapping between systems, which means no costly custom development or manual processes! Keep vendor information synchronized between systems and fully streamline your invoice processing.

Key Benefits:

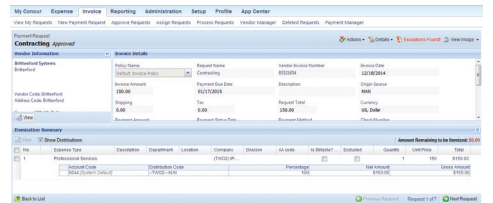

- Seamlessly integrate Concur Invoice and Sage Intacct
- Synchronize vendor records between systems
- Automatically pull approved invoices into Sage Intacct

Accommodates:

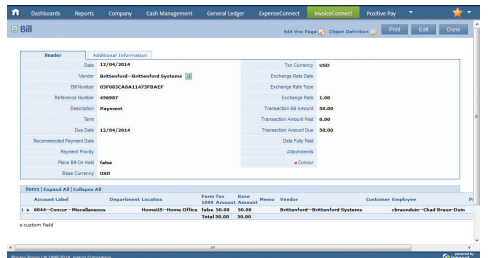

- Concur InvoicePay
- Intacct multi-entity
- Multi-currency

All Integration setting and data mappings are defined within your Intacct environment.

Scan and route invoices for approval through Concur Invoice.

Seamless integration generates the appropriate documents and transactions within Sage Intacct.
