Check Fraud Prevention Service Now Available

Reston, VA – October 10, 2012 – A new check fraud prevention service is now available to users of the popular Intacct accounting software. PositivePay™ check fraud prevention is a service that integrates with the Intacct Cash Management Module to dramatically reduce check fraud.

Developed by Brittenford Systems, a Reston, VA-based technology services firm, PositivePay™ is available through Intacct Platform Services. A data file is compiled for each check run and transmitted to the bank to reject fraudulent checks before the bank authorizes payment. The easy to use interface provides simple setup and configuration for any bank format required and multiple checking accounts.

“Check fraud is a major problem in all companies, no matter the size or industry. PositivePay eliminates this fraud before it occurs.” states Matt Rowley, Managing Director and Product Manager for PositivePay™ at Brittenford Systems.

For more information or to schedule a demonstration, contact Matt Rowley of Brittenford Systems at 703-828-2433.
