SchoolConnect for Intacct, Independent School Billing & Integration Suite

SchoolConnect is a billing and integration suite created specifically for independent schools to manage their financial and operational data within Intacct. SchoolConnect's pre-built applications integrate existing student management and tuition payment systems with Intacct, eliminating the need for manual data downloads and manipulating files. Having this integrated data within Intacct gives you more insight into your school's performance in key areas and allows you to maximize Intacct's robust financial management features. Easily create custom reports, access detailed billing information, generate bulk charges, and email student balances to households. SchoolConnect is also adaptable and can be configured to meet the specific requirements of your school needs today and into the future.

[Process Payments](#)

Easily integrate payments received electronically or through another application.

With SchoolConnect, your independent school can:

- » Create flexible invoice formats that provide statement activity for households
- » Easily generate student charges by household for clubs, activities, and specific fees (e.g. graduation, technology, etc.)
- » Synchronize student management data from systems such as Veracross and SchoolAdmin
- » Seamlessly integrate tuition and payment data from systems such as FACTS

With our extensive experience working with independent schools as an Intacct partner, Brittenford Systems is ready to help your school implement SchoolConnect. To learn more about SchoolConnect for Intacct, contact Brittenford at sales@brittenford.com.
